MonsoTag Water.

Bluetooth water leak detection

MonsoTag Water is a compact Bluetooth water sensor tag designed for smart monitoring applications. It detects the presence of water and delivers immediate alerts, helping to prevent water damage. With long battery life and secure connectivity, it provides frequent sensor updates.

- Water leak detection
- Bluetooth connectivity
- Temperature monitoring
- 5-year battery life

Key features.

01 Water leak sensor
Integrated water leak sensor with instant detection of water presence.

02 Real-time alerts
An alert as soon as water is detected.

03 Temperature monitoring
Built-in temperature measurement.

04 Bluetooth asset tag
Works as a Bluetooth asset tag with sensor data transmission.

05 Updates every 10 seconds
Location and sensor values are sent every 10 seconds.

06 Battery-powered
Compact battery-powered design.

Specifications.

Type	Bluetooth asset tag with sensors
Sensors	Water leak, temperature
Update interval	Location and sensor values every 10 seconds
Dimensions	40 × 40 × 10 mm
Enclosure	IP68, dust-tight and waterproof
Battery life	5 years
Power	Battery-powered

Key benefits

- Real-time water leak detection
- Helps prevent water damage and costly downtime
- Fast wireless data transmission
- Secure connectivity and efficient remote monitoring
- Long battery life for low-maintenance deployment
- Easy integration into asset monitoring applications

Typical applications

- Water leak detection in buildings and technical rooms
- Monitoring of pumps, pipes and equipment
- Basements, data centers and storage areas
- Cold-chain and environmental monitoring
- Smart inventory and operational insights
